

School of Education
Apeejay Stya University, Sohna, Gurugram

Details of Instructional Facilities Available

Psychology Resource Center – The students learn about the structure, content and process of different psychological tests (paper-pencil based and instrument based) to measure different behavioral traits of the individuals like intelligence, personality, locus of control, motivation, self-efficacy, self-esteem, span of attention, values, etc.

Curriculum Laboratory – The students prepare micro and macro lesson plans using text books of different classes (V – XII) and supporting reference materials. They learn using different teaching aids and borrow them for use during their practice lessons in schools.

ICT Resource Center – The students hold computer classes, English language learning and access the digital teaching resources including live lectures through DTH channels.

Science Laboratories – The students learn through demonstration of science equipment and conduct of experiments related to physics, chemistry and biological sciences.

Art and Craft Resource Center – The students use the art and craft materials like chart papers, colors, clay, crayons, paints etc. to prepare low cost-no cost teaching aids and subsequently use them in their practice teaching.

Performing Arts Center – The lab has musical instruments and a dance floor wherein the students practice playing of musical instruments and dance.

Physical Education Resource Center – The students practice indoor and outdoor games under supervision of physical education instructor / coach and also take yoga lessons to keep themselves physically fit in life.

Library – The school has a separate library containing books, journals and magazines and a sitting capacity of 60 for reading purpose.
