Water Conservation

University is using water for Drinking, Cleaning, Kitchen (Mess and Canteen), Toilets, Hostel, and Gardening. Water is being stored in 47 overhead tanks and 1 underground tank

Two rainwater storage underground tanks are available at campus to recharge ground water and for gardening purpose

Water saving Techniques

Water saving techniques adopted by university are as follows

- Control valves are provided in the water supply system to avoid over flow.
- Maintenance and monitoring of valves in supply system
- Water Conservation awareness for new students
- Checking spillage and leakage issues at earliest, if found any

Prepared By:

1. Name: Dr. Anupama Diwan
Designation: Professor

2. Name: Dr. Rani Mansuri
Designation: Assistant Professor

3. Name: Dr. Sonam Raheja
Designation: Assistant Professor

4. Name: Dr. Vijay Kumar
Designation: Assistant Professor
